About

I am a junior Front_End developer , I have a bachor's degree of Computer Science at Information Technology department where i gained a solid information of computer science and software engineering. My passion for web development was started by the positive feedback i received on my projects during my time at university, i have problem solving skills and algorithm

I have an interest in designing e-commerce websites, focusing on creative UI and UX. I strive to deliver good user interfaces and performance. I am constantly seeking to expand my knowledge and skills to stay current with the latest updates , i always strive to elevate my designing and coding skills to the highest level
